

①

Dear Michael!

FEB 25 2015

How are you doing?

I'm still doing great in the program, by the time

I came back from Ohio, I asked the program

manager to come back to this Therapeutic Community

Program again, and they accepted me to back here

to mentor new comers (drug and alcohol addicts).

I'm grateful to be in here because it's keeping my

mind busy and stay positive, by helping and sharing

with other people and I think that's the meaning of

my life, to use my mind and my heart to help

people. I have a plan for my future, that's why

it keeps me stay busy and positive until today. I

keep that hope and I believe someday when I go home

(2)

I can rebuild my life again by a good meaning and purposeful! My message is always: "Never Give Up".

I never stop improving myself every single day.

It's more than 2 years since I got locked up, I've been through a lot of things in this 2 years, sometimes

I can't believe it that I survived until today. Far

away from my family, I missed a lot of good

moments with them. But I'm lucky, because my

family, my girlfriend and my loved ones are still

waiting and supporting me, we get more understanding

each other than before, I believe that I'm the richest

person in the world, because I have someone to love,

I have something to hope for and I have something to

do. I hope that the U.S. Government'll give me a last

(3)

chance, I'll take it and do the best as I can with my all abilities and knowledges. Be honest to myself to move forward to the future with a new perspective.

The end of this letter, I'd like to say appreciate and thankful to whatever you have done to help me and also my family too. And also to your all partners, especially is Laura, she did a good job and very nice person. Again, thank you very much to you and Laura for your job.

Best Regards,

Hieu

(P/s: Have a nice day! Stay healthy and take care)
